What is Tae-Kwon-Do?

It is a version of an ancient form of unarmed combat practised for many centuries in the orient. Tae-Kwon-Do became perfected in its present form in Korea. Translated from Korean, Tae literally means to jump, kick or smash with the foot. Kwon means a fist, chiefly to punch or destroy with the hand or fist. Do means art, way or method.

Tae-Kwon-Do indicates the technique of unarmed combat for self-defence, involving the skilled application of punches, kicks, blocks, dodges and interception with the hand, arms and feet to the rapid destruction of the opponent.

The T.A.G.B. was formed in August 1983.

The British Tae-Kwon-Do council was formed on the 21st April 1988 and is the governing body recognised by the British Sports council.

Meaning of patterns

What is a pattern?

A pattern is a set of fundamental movements, mainly defence and attack, set in a logical sequence to deal with one or more imaginary opponents. Patterns are an indication of a student's progress.

Why do we perform patterns?

We practise patterns to improve and develop sparring techniques, flexibility of movement, master body shifting and to develop muscles, breathing and balance.

Why do we learn the meaning of patterns?

To draw inspiration from the heroic figures in Korea or instances relating to historical events.

24 patterns

The reason for 24 patterns in Tae-Kwon-Do is, General Choi compared the life of a man with a day in the life of the earth and believed that some people should strive to a good spiritual legacy.

Chon Ji – 19 movements

Literally means the heaven and earth. It is in the orient interpreted as the creation of the world or the beginning of human history, therefore it is the initial pattern played by the beginner. This pattern is split into two similar parts, one to represent the heaven and the other the earth.

Choong moo – 30 movements

Was the given name to the great Admiral Yi Sun Sin of the Yi dynasty. He was reputed to have invented the first armoured battleship (kobukson) which was the precursor to the present-day submarine, in 1592 AD. The reason this pattern ends with a left-hand attack is to symbolise his regrettable death having no chance to show his unrestrained potentiality checked by his forced reservation of his loyalty to the king.

Meaning Of Belt Colours

White signifies innocence, as that of a beginning student who has no previous knowledge of Tae-Kwon-Do.

Yellow signifies earth from which a plant sprouts as the foundations of Tae-Kwon-Do are being laid.

Green signifies the plants growth as the Tae-Kwon-Do skill begins to develop.

Blue signifies the heaven toward which the plant matures into a towering tree as training in Tae-Kwon-Do progresses.

Red signifies danger, cautioning the student to take control and warning the opponent to stay away.

Black is opposite from white, therefore signifying the maturity and proficiency in Tae-Kwon-Do and also indicates the wearers imperviousness to darkness and fear.

L Stance (Niunja Sogi) – Additional Information

The L stance is called L stance because of the shape the feet make when in position. There is no direct translation for the Korean word 'Niunja' into English.

Both knees should be bent within the stance with the weight being 70% on the back knee and 30% on the front knee.

There are 3 reasons for this stance:

1. Gives the ability to kick with the front leg without having to adjust stance.
2. Gives stability in the stance should the attacker sweep / kick the front leg.
3. Allows you to leap forward off the back leg into an action against your attacker (for example, back fist).
